Figure 10 shows the effect of the number of iterations on the error. The error decreases as the number of iterations increases, and the rate of decrease is faster for the proposed method than for the other two methods.

AFTERWORD

Regarding Fugate

[I was fairly easy to design his character, but I think I ended up drawing his appearance too child-like and naive.]

Regarding Okada Kôichi

[I had no problems creating his personality, but I just couldn't show it in his design as I had imagined.]

My previous story was a seinen piece so I wanted to draw a manga with a light plot + not because it was easier to do so, I thought if I could do well drafting stories with different genres, that would be great! I hope this work caught your interest at one point or another. Thank you for reading until the end!
